DATE MAILED: 06/21/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

1X

Office Action Summary	Application No.	Applicant(s)	
	09/738,900	LEE, HEUNG-BAE	
	Examiner	Art Unit	
	Temesghen Ghebretinsae	2637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 April 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

Claim 2 was objected however Examiner found English translation of JP Patent N0. 06-244754 filed by applicant and claim 2 now is rejected.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 -3 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Hiroshi (JP-6244754)

4. The prior art (fig.1) discloses a direct conversion demodulator in RF reception system comprising: a down mixer (112,114) for mixing a received RF signal and a carrier signals, and thereby converting the RF signal into baseband signals of channels I and Q.; a filter (132,134) for filtering high frequency component of the baseband signal; a differentiator (142,144) for differencing the baseband signal of the two channels output from the filter; a multiplier (152,154) for cross multiplying the baseband

Art Unit: 2637

signals of the two channels output from the differentiator and the baseband signal of the two channels output from the filter; an adder (162) for adding the baseband signal of the two channels output by the multiplier and thereby detecting data. The prior art is different from the claimed invention in that a detector for detecting a gain control level and an AGC for controlling gains (270) as claimed in claims 1 and 3 is missing or not disclosed. However, Hiroshi (JP-6244754) discloses a receiver comprising down mixer (109) for mixing a received RF signal and carrier signal; a filter (110,111) for filtering high frequency components of the baseband signal; **a detector for detecting a gain control level corresponding to the difference obtained by comparing the levels of the baseband signal of the two channels output by the filter with a predetermined level (see fig.27 (a) and (b)); an AGC for controlling gains of the baseband signals for each of the two channels output from the down mixer according to the gain control level detected by the detector.** Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the detector and AGC control (fig.27 (a), (b)) of Hiroshi in the system of the prior art so that the output signal of the prior art is maintained at a constant level and the data is detected correctly.

The detector of Hiroshi also discloses a multiplying unit for multiplying the baseband signals of the two channels with themselves; an adding unit for adding the baseband signals of the two channels multiplied by the multiplying unit and a level comparing unit for generating a gain control level corresponding to the difference obtained by comparing the levels of the signals detected by the adding unit with a predetermined level (see fig. 27(b)).

Response to Arguments

6 Applicant's arguments filed 4/5/05 have been fully considered but they are not persuasive. Applicant argues that Hiroshi does not disclose **a detector for detecting a gain control level corresponding to the difference obtained by comparing the levels of the baseband signals of the two channel by filter with a predetermined level**. Examiner disagrees with applicant's conclusion because Hiroshi does disclose **a detector (4202 (a) and 4202 (b)) for detecting a gain control level corresponding to the difference obtained by comparing the levels of the baseband signals of the two channel (4203) by filter with a predetermined level. (See fig. 27 (a) and (b))**

8 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temesghen Ghebretinsae whose telephone number is 571-272-3017. The examiner can normally be reached on Monday-Friday from 8 to 5. The examiner can also be reached on alternate

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel, can be reached on 571-272-2688. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should
